

British Columbia (BC)-Victoria is pleased to announce a Lung Immunotherapy Fellowship opportunity for 2022-2023. BC Cancer is committed to advancing progress in immunotherapy through basic science, translational and clinical trials research. BC Cancer-Victoria has a focus of activity in population-based research for patients receiving immunotherapy for advanced non-small cell lung cancer in everyday clinical practice. The focus is on safety and efficacy of immunotherapy in patient populations excluded or underrepresented in clinical trials. This 1-year fellowship program provides trainees the opportunity to undertake a project in population-based research and also participate in clinical trials involving immunotherapy.

Location: BC Cancer-Victoria, Victoria, BC

Eligibility: Trained in Medical Oncology, completing R5 residency year by June 2022 or earlier.

Funding: Fellowship is fully funded

Application: Please submit CV and cover letter to:
Dr. Doran Ksienski, MD FRCPC MPH
Clinical Associate Professor, University of British Columbia
Medical Oncologist- BC Cancer-Victoria
dksienski@bccancer.bc.ca

Start Date: Sept 2022
