17th CANADIAN MELANOMA CONFERENCE

February 23-25, 2023, Fairmont Banff Springs, Banff, AB

Abstract & Poster Competition

Participants are requested to submit an abstract of their research before Friday, January 13, 2023. A decision about acceptance of abstracts will be announced Friday, January 23, 2023. All invited poster presenters will have their conference registration fee waived (either the lead author or most senior author [not both]). The reviewing committee will select 6 abstracts from those submitted for oral presentation; the latter is scheduled for live, oral presentation at the Canadian Melanoma Conference in Banff.

Instructions and Guidelines for Poster Presentation

Eligibility

The competition is open to the following:

- Each presenter should bring his/her poster to display as a printed single large sheet of paper/plastic that can be mounted on a bulletin board/wall marked with his/her poster number. Posters should fit a 4'x6' poster board, landscape and poster location will be on a first come first serve basis.
- Anyone currently enrolled in medical school, residency program, fellowship program or recent graduates of a training program (less than 10 years in practice).
- Senior researchers/physicians can submit abstracts but will only be considered for poster presentation.
- The abstract submission deadline is Friday, January 13, 2023.
- The remaining selected abstracts submitted will be invited to prepare posters to be displayed at the conference venue.
- The abstract should include complete details of the presenter (e.g. title, authors' names and their affiliation, abstract).

Visuals & Text

- Present numerical data in the form of graphs rather than tables (as graphs make trends in the data much more evident). If data must be presented in table-form, it must be kept simple.
- Visuals should be simple and in bold
- Avoid submitting compactly packed, high-word-count posters
- Posters should be organized into subdivisions, e.g., Introduction, Materials & Methods, Results, Discussion, Conclusions, and References (avoid using too many citations)
- Use bright colours to enhance the detail
- Minimum font size is 18 pt

Reviewing Criteria

The decision will be made by a selected panel of the Conference Scientific Committee. The selection of the poster winner(s) will be based on:

1. Clarity of the poster
2. Impact of the research presented
3. Originality and completeness of work

To submit or for inquiries, please contact the conference team at: info@oncologyeducation.com
