

The BC Cancer - Vancouver Cancer Centre is pleased to announce an opportunity for a Malignant Hematology Fellowship in Multiple Myeloma and Plasma Cell Dyscrasias. This is a clinical fellowship with opportunities for additional clinical and translational research. The successful candidate will join the BC Lymphoma and Myeloma Program where our mandate is to provide comprehensive care for patients living with these diseases; contributing to the of the field through advanced care delivery (including complex immunotherapy), clinical trial participation and collaborations with our clinical and translational research teams.

BC Cancer provides a comprehensive cancer control program for the people of BC in partnership with regional health authorities. BC Cancer's mandate covers the spectrum of cancer care, from prevention and screening, to diagnosis, treatment, and through to rehabilitation. Our mandate is driven by a three-fold mission:

- To reduce the incidence of cancer
- To reduce the mortality rate of people with cancer
- To improve the quality of life of people living with cancer

This mission drives everything we do, including providing screening, diagnosis and care, setting treatment standards, and conducting research into causes of, and cures for, cancer.
