

BEST OF LUNG CANCER CONFERENCE 2026

Friday, December 4, 2026
VIRTUAL EVENT

Chaired by Dr. Rosalyn Juergens and Dr. Vishal Navani, the Best of Lung Cancer Conference 2026 offers Canadian oncology professionals a unique opportunity to stay current on the most impactful lung cancer data and treatment advances presented at ASCO® and ESMO® 2026 congresses. Expert speakers will distill key trials and clinical findings into actionable insights, helping clinicians integrate new standards of care and diagnostic tools into their practice.

This conference is essential for staying at the forefront of lung cancer treatment and enhancing patient outcomes with the most current, evidence-based practices.

Learning Objectives

- 1 Evaluate** uncommon thoracic malignancies relevant to lung cancer practice, including mesothelioma, large cell neuroendocrine carcinoma, and thymic epithelial tumors.
- 2 Explore** emerging innovations in lung cancer management, with a focus on robotic-assisted surgery, stereotactic body radiation therapy (SBRT), and the clinical application of antibody-drug conjugates (ADCs).
- 3 Analyze** recent advances and evolving standards of care in HER2-driven and other molecular subtypes of lung cancer, emphasizing personalized treatment approaches.
